

Parent Symposium

Child Development Supports

Nov
2

ARCQE's Child Development Supports project is excited to partner with Alberta Health Services for a Parent Symposium Webinar!

This year we're bringing the learning directly to you! This series of engaging webinars are designed to support families in enhancing their children's development in the comfort of your home!

1. Building Your Child's Fine Motor Skills

Learn from AHS pediatric occupational therapists about how to build fine motor skills through play and everyday opportunities

2. Understanding Your Child's Behaviour

Learn from an AHS pediatric psychologist and social worker about how to recognize emotions and unmet needs underlying your child's behaviour, and strategies to build cooperation and lower frustration.

3. Talking and Listening for Young Children

Learn from AHS pediatric speech-language pathologists about how young children develop talking and listening skills as they grow. Support communication skills in everyday activities.

There is time for conversations and questions after each session! Don't miss out on this worthwhile opportunity to learn from experts and connect with other parents.

Session 1

9:15 AM

Session 2

10:45 AM

Session 3

1 PM
